Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. 4. Claims 2 and 6 are allowable for reason(s) previously given. See 01 August 2006 communication.
5. Regarding claims 1, 3-4, 9-26 and 28, the prior art of record fails to teach or fairly suggest a thin-film deposition apparatus as claimed and specifically comprising the dividing plate made of at least three plates laminated together by securely bonding them over substantially an entire area of their interfacial surfaces so as to separate the radicals generated in the plasma discharge from the precursor gas while the precursor gas is in the internal space, wherein the internal space is divided into first and second diffusion sections by a middle one of the plates, and the middle plate includes a plurality of distribution holes interconnecting the first and second

diffusion sections, wherein the first diffusion section includes an inlet through which the precursor gas is introduced into the first diffusion section, and the second diffusion section includes a plurality of discharge holds through which the diffused precursor gas can enter the film deposition space. Further, no other properly combinable art was located to provide the missing teaching, along with the requisite motivation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
